

(a)

Target-specific descriptor eligibility
Expert dependency graph + rule-based compiler

270 candidate features x 9 targets
2,430 target-feature classifications
291 nodes; 2,438 directed relations
compiler/reference match: 2,430/2,430

P1
Composition

68 framework-composition
5 working-ion descriptors
73 total features

P2
Relaxed structure

Adds target-eligible descriptors
from DFT-relaxed structures
77-93 total features

P3
Legitimate post-DFT

Adds target-eligible energetic,
stability and electronic descriptors
96-112 total features

(b)
