

(a)**Target-specific descriptor eligibility**

Physical dependency graph + rule-based compiler

270 candidate descriptors × 9 targets | 2,430 feature-target classifications
291 nodes; 2,438 directed relations | compiler/reference agreement: 2,430/2,430**P1****Composition**Framework composition
and working-ion
descriptors**73 descriptors****P2****Relaxed structure**Adds target-eligible
descriptors from
DFT-relaxed structures**77-93 descriptors****P3****Later computed
information**Adds eligible energetic,
stability, and electronic
descriptors**96-112 descriptors****(b)**
